

dear commitee of nab and fcc:

I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve therefore I am writing this hoping to put an end to lobbies strong hold. im a loyal user of xm, and im also a retail seller of xm. by passing this act you will do 2 things. 1: you hurt customers financially who have paid for the equipment and have paid for the service. the only reason people have committed to satellite radio is because if they can listen to what they enjoy all around the united states then it would make sense, rather than listening to some dry dj or worrying when the station is going to give out. this would make sense to all fm and am users. secondly you will hurt retailers and wholesalers who sell this product and make residuals off the product, so you will hurt consumers and retailers as well thus affecting a tiny bit of the economy because we all know that consumers are 2/3 of the economy and every thing that consumers spend their dollar will ultimately cycle through and help the economy, but you guys know this already so stop your crying and let satellite radio live
